MEET IN CAMEROON NEXT WEEK

Reforms and e-comm top WTO agenda

MUKESH JAGOTA
New Delhi, March 19

ON THE TABLE

THE 14TH MINISTERIAL Conference of the World Trade Organisation (WTO) next week is expected to have detailed discussions on the broad agenda of reform of the global trade regulator that faces challenges to its mandate of freer trade, an official.

The MC 14 will take place from March 26 to 29 in Yaoundé, Cameroon, and will see the participation of trade ministers from 166 member countries along with senior officials.

The meeting comes at a time when tariff wars initiated by the US, the biggest trading nation, have led to questioning the WTO's effectiveness in dealing with such unilateral actions.

The reform would include getting the WTO's two-tier Dispute Settlement Mechanism back on track.

The global trade regulator's dispute settlement system has not fully functioned since 2019 because the US has blocked the appointment of members to the Appellate Panel.

Due to the lack of a quorum in the appellate body, all trade disputes between members are ending in a void.

The second area expected to take up considerable time is the fate of the moratorium on the taxation of electronic transmissions, or the E-commerce moratorium as it is called at the WTO.

The moratorium on the taxation of electronic transmissions has been in place since 1998 and has been

■ Meet comes at time when US tariffs have raised questions on WTO's effectiveness

■ Reform to include getting WTO's 2-tier dispute settlement mechanism back on track

■ Fate of moratorium on taxation of electronic transmissions to be decided

extended every two years at every MC because countries have not been able to reach a common ground even on the definition of e-transmissions. Debate continues on whether e-commerce should cover content like movies, games and software or the medium that carries that content as well.

The latest moratorium expires on March 31 and will be placed before the members for another extension.

The US, European Union and Japan are among countries that want the moratorium to be made permanent. From India's standpoint another issue is the Investment Facilitation for Development (IFD) Agreement, which many countries are pursuing as a plurilateral agreement.

Nano NPK to help cut fertiliser use, boost yield

SANDIP DAS
New Delhi, March 19

THE CENTRE'S APPROVAL of cooperative major IFFCO's liquid and granular variants of nano-NPK nutrients may reduce the usage of chemical fertilisers, lower farming input costs, and boost crop yield, according to a senior official.

"Nano fertilisers are a complementary solution that enhances efficiency and sus-

tainability even if they are not an immediate replacement for conventional fertilisers," an IFFCO official said. The nano variants of NPK are first of its kind formulations which integrate both foliar and basal application methods and have been approved under the fertiliser control order (FCO).

The approval comes amid fears that domestic production of urea and Diammonium Phosphate (DAP) may be

impacted by supply disruptions of LNG caused by the West Asia war.

The official said that after the FCO approval, liquid and granular variants of nano-NPK, an integrated soil nutrient management system will be progressively established leading to balanced fertilisation practice.

According to an official statement, nano-NPK Liquid is designed for foliar nutrition.

Niti flags \$8.1-billion export opportunity in sports equipment

FE BUREAU
New Delhi, March 19

TO POSITION INDIA as a global manufacturing hub for sports equipment, NITI Aayog has recommended fiscal support of ₹7,500 crore over five years (2027-31). The proposed funding will focus on developing cluster infrastructure, bridging competitiveness gaps, and supporting certifications, market access, and branding initiatives.

Such support is considered crucial to boosting sports equipment exports to \$8.1 billion by 2036, up from a modest \$275 million in 2024. This growth hinges on addressing a 15% cost disadvantage compared to leading Asian peers, the think tank said in its report titled 'Realising the Export Potential of India's Sports Equipment Manufacturing Sector'.

India's global presence in sports equipment exports remains limited, with a market share of around 0.5%, despite a sizeable domestic manufacturing base. In 2024, exports were largely concentrated in a

narrow range of products such as cricket equipment, inflatable balls, boxing gear, and athletic or weightlifting equipment. The global sports equipment export market was valued at approximately \$52 billion in 2024, with China accounting for 40-50% of the share.

On the supply side, key challenges include high raw material costs, expensive land, and elevated certification expenses. On the demand side, Indian manufacturers lack strong forward linkages with global anchor brands, along with a cohesive "Brand India" narrative.

"Challenges such as cost disadvantages relative to China, limited access to advanced materials and technology, infrastructure and logistical gaps, and quick demand side linkages continue to constrain growth," said Sanjeet Singh, senior adviser at Niti Aayog. Although India's footprint remains small, the global sports equipment market — currently valued at \$140 billion — is projected to expand to \$300 billion by 2036.

Give them peace of mind, not just a paycheck

Leading aggregators of the country have adopted the National Pension System (NPS) platform. Other aggregators and employers are encouraged to extend the NPS benefits to their platform-based workers.

Highlights

- More than 1.25 lakh platform workers enrolled under NPS
- Portable
- No minimum contribution
- Attractive Returns
- Flexible withdrawals with no lock-in period
